

# convergence

a definite solution

## Company Profile

In January 2010 Convergence was founded as a spin-off company from Twente University (NL). Ever since, Convergence specialized in the design and manufacturing of a wide range customized liquid and gas handling systems for laboratory and industry purposes.

Quality, customer satisfaction and innovation have been important values during the development of Convergence. In 2014 the company was rewarded for the ongoing dedication and commitment: Convergence was certified to ISO 9001:2008

## MISSION & VISION

Convergence has the mission to be 'Triple A' in improving research and handling fluids:

- Accurate
- Automatic
- Awesome

The modern and user-friendly design of Convergence's systems, combined with an excellent support and product training makes working with a measurement and control system reliable, easy and efficient.

## OUR VALUES

From the first generation systems onwards, user-friendly systems and software, high quality and customization of every machine have become key features and distinguishes Convergence's products from other products in the market.

The ultimate system can be made by ensuring a close collaboration. Doing so, Convergence will share experience and knowledge when selecting components and designs your customized system.

## CORPORATE SOCIAL RESPONSIBILITY

Corporate Social Responsibility is an important part of our corporate culture. Convergence is committed to sustainability and therefore wats to take its responsibility toward society, employees and the environment.
